Introduction

Hello,

My name is Larry Scott.

I am just a normal guy who has tried almost everything in order to make a few dollars online. I have spent thousands of dollars and endless hours looking for the get rich quick button that everyone is looking for.

Guess what? I never found it. I did find out what doesn't work. Jumping from one program to the next is an endless struggle and a guarantee for defeat. And I won't mention the drain on your bank account. I am retired now and living a good life but not after many ups and lots of **downs**.

Through out my search for the perfect program to make money by doing nothing I discovered that you need certain things everyday online in order to succeed. I was looking for something simple and not another job. I had one of those and retired from it. I wanted something that anyone could do and succeed.

I wanted to make this information as accurate and as easy to follow as I could so anyone that is interested in making money online could do so with as little trouble as possible.

In the next few pages I will explain what I discovered in order to make money online. It is the easy way for anyone to profit without investing their life savings. If you are willing to stay focused and see how easy this is then you too can be earning some extra money online real soon.

It is simple to set up and it will make money. It is not a get rich quick system. Like I said before, I never found that system. But I did find one that works and it is available for everyone that wants to use it. I spend about an hour a day making it happen. I will not sugar coat it and make false promises. No B.S. Here Just Facts.

This Is The Exact System I Use Everyday

To your success

Overview

Your first income stream is just a few clicks away.

You will be able to maintain it in 30 minutes a day or less.

You get paid every month.

Setup can be done in 15 minutes or less.

It almost runs on autopilot.

***It really is that simple. Making money
does not have to be complicated.***

(KISS) Keep it simple stupid fits in here.

Everyone is getting the cart in front of the horse!

They tell you to start a business, any business so you can make money and then we will get the tools to run it and make it run smooth.

What I discovered is things run a lot better if you have the tools in place before you start or buy a business. For that reason I decided that the right way to make an online income was to use the best tool I could find to make it happen. The tool that runs this business is a service from Trafficwave.net The top of the line autoresponder in my opinion.

Every business online or off needs an autoresponder to manage the everyday requests from their customers. You can stay in touch with all your customers or prospects from your control panel in a few short steps.

If you want to be in business this is the first tool you should choose.

It is not free to start your own business but this is as close to free as it can get. If you can not afford \$17.95 a month to change your life forever then I can not help you. You should delete this report and look for another rainbow.

The Heart Of The Business

The heart of the business is the tool that makes the system work. I started using [Trafficwave](#) in 2009 and in my second month I was in profit. I have received a check from them every month since I started with them back in 2009.

Every other program that I have tried either folded up or I jumped ship on them before I lost any more money. Businesses come and go everyday but the tools to run them are still in place. That is why I chose the tool to be my primary business.

Every business either online or off needs a way to keep track of its customers. An **autoresponder** is like a secretary that never complains and you don't have to pay overtime. It will keep track of all incoming requests for information and you can contact all your customers by sending one email.

Have you ever tried to send an email to more than one person at a time. What about 100 or maybe 1000 at the same time. If you try it with your personal email account your ISP provider will freeze your email account. If you are lucky it will only be for 24 hrs.

Trafficwave has a fixed price of \$17.95 per month.

They allow unlimited members and unlimited campaigns. **I repeat it is a fixed cost every month.**

You can get started with a free trial for 30 days. Unlike most other autoresponder services, with higher monthly fees, and the more members you have the more you pay.

This chart compares some of the competition:

Compare To The Competition:

The table below shows a comparison of what some of the other autoresponder services charge compared to TrafficWave.net's low monthly flat rate:

List Size:	<u>Aweber</u>	<u>Constant Contact</u>	<u>iContact</u>	<u>GetResponse</u>	TrafficWave.net
0-500	\$19.00	\$15.00	\$10-\$14*	\$18.00*	\$17.95
501-2,500	\$29.00	\$30.00	\$14-\$29	\$28.00	\$17.95
2,501-10,000	\$49-\$69*	\$75.00	\$29-\$74	\$45.00*	\$17.95

* Pricing info is a range and will vary based on list size and other variables

This is all it takes for you to be earning an income online. Nothing else to buy. Trafficwave is a flat rate autoresponder service with an affiliate system setup that will allow you to collect income from members 10 levels deep.

You will not get rich over night but your income will grow every month. After just three members your \$17.95 a month is covered. You can quit looking for that get rich quick scheme and do something that works. You will not be glued to your computer hour after hour searching for a new system that promises to make you rich. Quit looking for the magic button and do something that works.

Here is a chart of what your income could be in a perfect world. We know it is not perfect, so anywhere in between is fantastic.
